Zero Trust Cyber Associate (ZTCA)

The Zero Trust Cyber Associate path enables you to gain a clear understanding of the need to transform to a true zero trust architecture and be introduced to the three sections and seven elements one must understand when embarking on a zero trust journey.

6 of 6 completed

Prerequisites	None
Duration	~5 hours
Badge	Zero Trust Cyber Associate (ZTCA)
After completing this path, you will be able to:	• Recognize the importance of shifting from a legacy network and security architecture to a zero trust architecture in a new world of digital transformation • Identify the background and importance of the three sections needed to build a successful zero trust architecture • Discover how connections are made to and from Zscaler's Zero Trust Exchange • Determine the technology and architectural considerations needed when building a true zero trust architecture • Explain how Zscaler's Zero Trust Exchange accomplishes each of the seven elements of a true zero trust architecture

This path will prepare you to become a Zscaler Zero Trust Cyber Associate
